

Curricular Unit Form

Updated On	2023/10/04									
Curricular Year / Period	2023/24 / S1									
Course	Basic Education									
Curricular Unit	Research Methodologies in Education									
Language(s) of Instruction	Português									
ECTS/tempo de trabalho (horas)	ECTS	Total	Horas de contacto semestral							
			T	TP	PL	S	TC	E	O	OT
	4	100	0	41	0	0	0	0	4	0
	T - Theoretical; TP - Theoretical and practical; LP - Laboratory Practice; S - Seminar; TG - Tutorial guidance; FW - Fieldwork; T - Training; ; EC - Clinical teaching; O* - Other hours typified as Clinical Training under the Directive 77/453/EEC of June 27, adapted by Directive 2005/36/EC.									
Teacher in charge (GDPR consent) [complete name, email]	Amélia De Jesus Gandum Marchão / ameliamarchao@ipportalegre.pt									
Prerequisites [Curricular Units that must precede and specific entry competences]										
Learning outcomes [Description of the overall and specific objectives] [Knowledge, skills and competences to be developed by students]	<p>General: Recognize research as a foundation for the construction of knowledge in education;</p> <ul style="list-style-type: none"> . To know ethical procedures and attitudes in research in education; . Knowing research paradigms applied to education; . To know different methodological approaches in research in education; . To know the instruments and procedures for collecting and analyzing data appropriate to research in education; . Acquire knowledge that allows to define a small research project in education. <p>Specific: Distinguish scientific knowledge among other forms of knowledge;</p> <ul style="list-style-type: none"> . Differentiate existing research data collection techniques and instruments in education; . Select different modes of treatment and data analysis; . Use scientific language; . Use critical attitudes when attending sessions, researching and analyzing materials, and building a small research project. 									
Sustainable Development Goals										
Syllabus	<ol style="list-style-type: none"> 1. Scientific knowledge and its characteristics 2. Research in education: fundamentals, assumptions and objectives 3. Ethical issues in educational research 4. Organization of the research process: steps and methodologies 5. Data collection techniques and tools 6. Data analysis and interpretation procedures 									
Teaching methodologies (including assessment) [Specify the types of assessment and the weights and evaluation criteria]	<p>1 - Teaching methodologies</p> <p>The methodology aims to foster a reflexive, critical and investigative attitude within the teaching profession. It integrates moments of teacher exposure, research, reflection and application of knowledge in the accomplishment of a "draft" of a research project. In theoretical-practical sessions (TP) and, along with the exposure of teachers, will be created moments of interaction, research and reflective analysis, using different materials and resources, particularly in the implementation of application exercises and draft research project.</p> <p>2 - Period assessment</p>									

	<p>The evaluation considers: the research, the analysis of materials and their translation into a small research project.</p> <p>Criteria for evaluating the research project are: quality, timeliness, feasibility and rigor of the research project submitted, taking into account the research and analysis of support materials, as well as the adequate use of scientific language. The project is assigned weighting eight (8) and the participation, in classes, is assigned weighting two (2).</p> <p>3 - Examination assessment</p>
